Cristina Amon, Dean

MEMORANDUM

2018-19/08

To: Assistant and Associate Professors, FASE

cc: Chairs and Directors

From: Cristina Amon, Dean

Date: February 8, 2019

Re: **Hart Early Career Professorships: Call for Submissions**

I am extremely pleased to issue the second call for submissions to the Percy Edward Hart and Erwin Edward Hart Professorships in the Faculty of Applied Science and Engineering. Resulting from the generous estate of Erwin Edward Hart, an alumnus of the Faculty of Applied Science and Engineering, we established an endowment in 2016 from which the proceeds are used to fund Early Career Professorships in our Faculty. This endowment also supports funding for the Hart Teaching Innovation Professorships. The second call for submissions for those Professorships will be issued in Spring 2020.

The Hart Early Career Professorships will be awarded to faculty members who are pre-senior promotion, and who have demonstrated a high level of research excellence and exemplary graduate mentorship. Each recipient of the Hart Early Career Professorships will be awarded an annual grant in the amount of \$75,000 to be used for research projects and graduate student support. The funds must be utilized over 4 years (the 3-year term of the Professorship plus an additional year). Requests for a carryforward of funds to a 5th year will be considered with justification. All recipients of the Hart Early Career Professorships will be required to submit brief annual progress reports to their Chair or Director, with a copy to the Dean.

Terms and process for submitting a nomination to the Hart Early Career Professorships:

1. The Professorships are for a 3-year term and are non-renewable
2. Professorships to take effect on July 1, 2019.
3. Nominees will be pre-senior promotion (i.e. within 10 years from the start of their faculty appointment)
4. Nominees should hold no other chair appointments or distinctions (i.e. CRC, McCharles Early Career Research Distinction, endowed chair, distinguished professor, etc.)

5. Nomination package will include:
 - a. Letter of support from Chair/Director
 - b. Description of the nominee's research plan and expected outcomes of the research over the 3-year term of the Professorship and beyond (300-500 words)
 - c. Description of the nominee's approach to graduate mentorship (300-500 words)
 - d. A budget outlining how the funds will be allocated (i.e. number of graduate students supported; supplies and equipment for research projects).
 - e. Nominee's up-to-date CV

Submissions should be received in the Dean's Office (dean.engineering@ecf.utoronto.ca) by March 29, 2019. If you have any questions about the Professorships or the submission process, please contact Lisa Camilleri (lisa@ecf.utoronto.ca).
