COVID-19 Identify, Assist, Refer Reference Guide for U of T Engineering Students

The Faculty of Applied Science & Engineering is committed to fostering a culture of care and support as students navigate mental health challenges.

Amidst the COVID-19 global pandemic, there are additional challenges and needs to consider when supporting one another.

The “Identify, Assist, Refer” approach will help you to recognize when someone is experiencing a mental health challenge and can still provide guidance in offering assistance and facilitating help-seeking behaviours.

This guide outlines additional considerations as you are supporting students navigating mental health challenges in the context of COVID-19 and our collective transition to virtual contact and communication.

To contribute a U of T Engineering mental health resource to this guide or to www.uofteng.ca/mentalhealth, please email: mentalhealth@engineering.utoronto.ca

Being able to identify when someone is experiencing a mental health challenge is an essential first step in getting them connected to helpful resources. There are a number of common indicators of emotional or psychological stress that you can recognize, even in our virtual mediums. These behaviours, thoughts, and feelings might seem:

• Out of character for someone
• To occur all of a sudden
• Like common, everyday responses to life, but persist over a period of time (e.g., multiple days or weeks), occur frequently, or seem to be having a significant impact.

If you recognize that someone may be experiencing a mental health challenge, follow up with them and share what you’ve noticed that makes you feel concerned about their wellbeing. You may also find it helpful to engage in a conversation regarding the emotional impacts of the COVID-19 pandemic as well. Engaging in a helpful conversation will make for a more appropriate referral.

You can encourage helpful conversations by:

• Choosing a suitable virtual space and time that allows for a meaningful, informative, comfortable and uninterrupted conversation. Note: You may want to encourage a phone/video call for this conversation but defer to the student’s preferences (e.g., they may feel more comfortable with a chat-based conversation because of privacy or safety reasons. Chat-based support can be equally effective).
• Validating their feelings
• Listening actively without judgment
• Resisting the temptation to give advice or “fix” what you perceive to be the problem
• Not promising to keep secrets
• Instilling a sense of hope by validating their feelings and letting them know that there are resources that many people access and find helpful

Once you understand the challenges the student is experiencing, you can help to identify appropriate resources or services. How you make the referral will vary depending on context, your relationship with the student, and their willingness to engage in further help-seeking — but in general, the steps to an effective referral are:

• Acknowledging your limitations
• Sharing resource options
• Explaining what they can expect from the resources being offered, the name of the helping professional, service access information, etc.)
• Following up and offering further referrals

For details on resources to contact when there is a specific safety concern, refer to the section titled EMERGENCY & URGENT RESOURCES on page 6.
WHAT TO DO IF...

SOMEONE’S BEHAVIOURS, THOUGHTS & FEELINGS RAISE SPECIFIC SAFETY CONCERNS

Behaviours, thoughts and feelings that raise specific safety concerns include:

- Vague or overt references to harming self or others
- Vague or overt references to thoughts of suicide
- Confusion, disorientation, apparent disconnect from reality
- Expressions of hopelessness, helplessness, worthlessness

If you are unsure whether there is a specific safety concern, directly and openly ask the student (e.g., “Have you self-harmed recently?”, “Are you thinking about suicide?”, “Are you feeling confused or disoriented right now?”, “Does your situation make you feel hopeless, helpless or worthless?”).

YOU SUSPECT A SAFETY CONCERN, PRIOR TO INITIATING CONTACT WITH A STUDENT

- Develop a plan prior to initiating contact. This may involve reaching out to a counsellor at My SSP to discuss your approach and the resources you may offer.

YOU’RE CONCERNED THERE IS RISK TO SOMEONE’S SAFETY

1. Directly connect the student to someone in a position to help (i.e., a service listed in the EMERGENCY OR URGENT RESOURCES section on page 6). This can be done by making a three-way call to the resource with the student, or virtually accompanying them on the phone to a resource like CAMH’s Psychiatric Emergency Department.

   NOTE: If the person disconnects from the conversation because they do not wish to be connected to the resource, continue making the connection without them. The urgent/emergency resource will support you in continuing to support this student.

2. Pass along any critical information that you have gathered. By sharing this information, you are allowing the student to correct any misinformation and provide additional detail.

3. Take direction from both the person you have connected them to and the student to determine whether it is best to stay or disconnect/leave.

4. Connect with your supervisor to let them know what happened, determine additional steps and let them know how you are doing.

5. Follow-up with the student to determine if the connection was helpful and/or if any additional resources are required.

6. Seek help for yourself. Take the time and space needed to take care of yourself as you support others. All of the resources listed in this document are available for you too!
